Purchase of *STAR*

The semimonthly issues and the cumulative index issues for the 1964 volume year are available postpaid on subscription and in single copy from the Superintendent of Documents, United States Government Printing Office, Washington, D.C., 20402, United States of America.

Semimonthly issues. Annual subscription rate: $25.00, domestic; $31.00, foreign. Price per single copy: $1.50, domestic; 25¢ extra for foreign mailing.

Cumulative index issues. Annual subscription rate: $30.00, domestic; $34.00, foreign. Price per single copy varies according to the number of pages.

Domestic subscription rates apply to the United States, Canada, Mexico, and all Central and South American countries, except as noted below.

Foreign subscription rates apply to Argentina, Brazil, British and French Guiana, Surinam, British Honduras, and all other countries throughout the world.

Payment should be by check, money order, or document coupons, and must accompany order. Remittances from foreign countries should be made by international money order, or draft on an American bank, payable to the Superintendent of Documents, or by UNESCO book coupons.

Introduction

What STAR Cumulative Indexes Are

This publication contains cumulations of the indexes to *Scientific and Technical Aerospace Reports (STAR)* for the calendar year 1964 (Volume 2, Numbers 1 through 24). These are: Subject Index, Corporate Source Index, Personal Author Index, Report/Accession Number Index, and Accession/Report Number Index. The accession number is the identification given by NASA to each item indexed in the year indicated (e.g., N64-12345). In each index it is followed by a number (e.g., 13-20) for locating the abstract in the semimonthly issues of *STAR*; the first two digits of this number identify the issue of *STAR*, and the last two the particular subject category in which the abstract appeared.

This Annual Index is divided into four separately bound sections. Sections I and II contain the Subject Index; Section III contains the Corporate Source, Report/Accession Number, and Accession/Report Number Indexes; Section IV contains the Personal Author Index.

This cumulative index for *STAR*, Volume 2, Numbers 1–24, supersedes the previous semimonthly, quarterly, and semiannual indexes for the volume year.

How The Subject Index Was Prepared

Each item announced in the abstract sections of *STAR* was indexed by a number of subject terms. In the individual Subject, Corporate Source, and Personal Author listings the item was represented by a "notation of content" rather than by its original title, since an author's title may not be sufficiently detailed or informative, or not written in the vocabulary of the terms used for indexing. The same general plan is followed in this cumulation of the semimonthly indexes.

Three main objectives guided the design of this Annual Index: (1) ease of use; (2) efficient retrieval, both from specific and general approaches; and (3) control of the number of subject terms and the number of entries under each term within practical limits. These objectives, and consideration of the different types of searches for which this index may be used, have led to the dropping of some subject terms originally used in the semimonthly indexes. Items originally indexed under lightly posted specific terms have been transferred to more general terms, provided this did not result in an unwieldy total number of postings under any one term. As a rule, the specific terms dropped were composite, two-word terms, which were transferred to more general terms with which they shared a "concept word" (e.g., ABSORPTION SPECTRUM to SPECTRUM). Composite terms containing proper names, or names of systems (e.g., SATURN I LAUNCH VEHICLE), were retained, regardless of the number of their postings.

The subject terms in this cumulative index are arranged alphabetically, and supplemented with cross-references which constitute directions to the user that will enable him to modify, enlarge, or narrow his search in accordance with his specific interests. Three types of cross references are used:

1. "See" ("S") is used to relate broad concepts, too general to be useful index terms, to the specific terms used in the Index. For example:

ATTENUATION
S ACOUSTIC ATTENUATION
S MICROWAVE ATTENUATION
S RADIO ATTENUATION

"S" is also used to indicate which of a pair of synonyms has been used in this Index. For example:

COLUMBIUM
S NIOBIUM

2. "See also" ("SA") directs a searcher from a general to a specific term for postings under the specific term that are not repeated under the general heading. For example:

HEATING
SA AERODYNAMIC HEATING

tells a searcher that postings under AERODYNAMIC HEATING are different from those under HEATING. "SA" thus directs the user to separate, unduplicated listings that he should explore.

3. "Confer" ("CF") is used to relate associated concepts usually having different groups of postings. For example:

PLASMA
CF MAGNETOHYDRODYNAMICS

tells a searcher that, while these terms are related in subject matter, postings under each term are different.

Finally, a searcher should use the notations of content in the Index to narrow further his quest for particular items. This is because subject terms can readily include more than one class of document. For example:

CATHODE
ELECTRON TUBE MATERIALS AND THERMIONIC EMISSION PROCESSES

SPACE CHARGE & IONIZATION REGIONS NEAR ARC CATHODE

specify two documents under one term that cover sharply different topics.

NASA documents (identified with an asterisk in the Report/Accession and Accession/Report Number Indexes), as well as *STAR* itself, are available without charge to:

1. NASA Offices, Centers, contractors, subcontractors, grantees, and consultants.
2. Other U.S. Government agencies and their contractors.

Availability (contd.)

3. Libraries that maintain collections of NASA documents for public reference.
4. Other organizations having a need for NASA documents in work related to the aerospace program.
5. Foreign organizations that exchange publications with NASA, or that maintain collections of NASA documents for public use.

AGARD reports that are not commercially available will also be provided by NASA to the organizations listed above.

Other non-NASA documents are provided without charge only to NASA Offices, Centers, contractors, subcontractors, grantees, and consultants. (Requests for commercially available items should be submitted directly to the source; for example, JPRS publications should be requested from the Joint Publications Research Service, and the JPRS number should be cited.)

How to Request Listed Documents

If you are currently registered with NASA, send a completed *Document Request* (Facility Form 492) to:

Scientific and Technical Information Facility
P.O. Box 5700
Bethesda, Maryland, 20014

If you are eligible to receive documents without charge but are not registered with NASA, request *Registration Form—Technical Publications* (NASA Form 439) from:

Scientific and Technical Information Facility
Attention: NASA Representative
P.O. Box 5700
Bethesda, Maryland, 20014

How the Public May Obtain Listed Documents

For reference purposes, NASA documents listed in *STAR* may be consulted at one of the organizations listed on the inside back cover. Commercial and copyrighted publications listed in *STAR* may usually be consulted in libraries or purchased from publishers or booksellers.

The public may purchase NASA documents listed in *STAR* from either of two sales agencies, as specifically identified in the abstract section:

- Clearinghouse for Federal Scientific and Technical Information, (OTS) 5285 Port Royal Road, Springfield, Virginia, 22151.
- Superindendent of Documents (GPO), U. S. Government Printing Office, Washington, D.C., 20402

NASA documents available from the Clearinghouse for Federal Scientific and Technical Information are sold in full size and microfiche form. If printed copy is not available, a facsimile copy is provided. The price is given in the abstract section.

The public may request non-NASA documents by writing to the source, or to other information systems. Identification other than the NASA accession number (N64-12345) should always be provided when requesting such a document from its source.

SUBJECT INDEX

Listing of Reports by Subject

A Notation of Content, *rather than the title of the document*, appears under each subject heading; it is listed under several subject headings to provide multiple access to the subject content. The NASA accession number is located under and to the right of the Notation of Contents (e.g., N64-12345), followed by a four digit number (e.g., 13-02) for locating the abstract in the first section. The first two digits identify the issue of *Scientific and Technical Aerospace Reports*, and the two digits following the hyphen identify the category as listed in the Table of Contents.
